B3 Vertical Compact MINI-LIFT

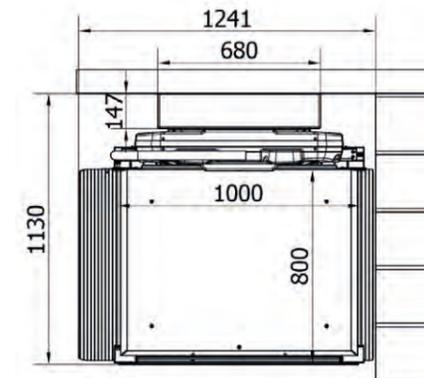

With the B3 compact step-lift you will find a simple and easy lift solution that can be mounted without major structural changes. This wheelchair access lift is also a perfect access solution for mums with buggies.

This compact unique step-lift consists of a lift platform that folds up when not in use thereby taking up minimal space. The platform travels on a vertical tower containing the driving motor. When the lift is not in use, its simply folded away. Ideal for school stages.

Certified in accordance with the Machinery Directive.

This foldable compact step-lift is equipped with an emergency lowering device. Furthermore, it can be individually customised to suit most environments.

The platform's wings and base have a disable function to prevent any trapping hazard. The lift has a steady and pleasant drive. This lift is also available for outdoor use.

Remotes

Handheld remote control

Mounted remote for installation in column or masonry.

Mounted control box for mounting on column or wall.

Manufactured by Denmark's largest and oldest manufacturer and supplier of stair-lifts for disabled people.

VIVID Lifts Ltd highly appreciates safety, **quality** and design.
